Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The disclosure is objected to because of the following informalities: On page 1, line 5, "2001;" should be --2001, now U.S. Patent No. 6,609,538;--.

Appropriate correction is required.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cannon. See column 4, lines 22-38 of Cannon. The position shown in Figure 5 of Cannon is read as a "relieving position". The gap formed between the work port and the tank port in Figure 5 of Cannon is read as a "first gap". The position shown in Figure 6 of Cannon is read as a "neutral position". Claim 1 is considered met by Cannon except for there being a specific disclosure in the neutral position of Figure 6 of Cannon that the work port and tank port are connected by a small gap. It would have been obvious to a person of ordinary skill in the art to provide a small gap between the work port and the tank port in the neutral position of Figure 6 of Cannon in order to provide for relief of any leakage from the supply port to the work port in the neutral position of Figure 6 of Cannon. Regarding claims 2 and 3, the specific size of the gap would have been obvious to a person of ordinary skill in the art at the time the invention was made since applicant assert no criticality in the specific size.
